

Chris Jackson

Chris has been our creative and technical mainstay from the start. He is an experienced SketchUp practitioner who has tutored all six of our 'taster' sessions on a voluntary basis. Working in IT Support at North Herts. College, he arranged for the Goldsmith Centre's computer suite to be available for those sessions, with SketchUp on all of the PCs.

He is the author of the only 3D models in Google Earth of Letchworth buildings at the outset of this Competition. He generously allowed us to use images of them for our publicity, and he composed our header image with the 3Dlgc logo that you see above, plus our FaceBook page and our main poster design for the Competition. **Thank you Chris - you're a star!** \ now busy with College work for the new intake of students...
